

Foster Group Introduces Audio Updates via Podcast
December 26, 2007

Foster Group is pleased to announce that clients are now able to subscribe to our quarterly audio updates through iTunes. While these audio updates have been available on our website in the past, you are now able to subscribe to them through iTunes and have them downloaded automatically to your iTunes library as they become available. If you are interested in this service, please visit our Library page in the News and Resources section of the website and click on the link at the bottom of the Audio Updates section. If you do not currently have iTunes installed on your computer there is also a link to the free iTunes installation.
